

# What we can **Offer** ?

YEAR 2026

# Who we **are** ?

Aksyra Exports Global LLP is built upon generations of agricultural knowledge and long-standing engagement with farming communities across Gujarat, India. Evolving from extensive domestic agricultural trade, our company represents a natural transition toward global markets by combining traditional farming expertise with modern export practices.

Through strong farmer relationships and region-based sourcing networks, we ensure consistent access to high-quality agricultural produce cultivated under natural conditions and responsible farming practices.

Our core expertise lies in sourcing and exporting various categories of Indian tobacco leaves including Burley tobacco, Rustica tobacco, chewing tobacco varieties, specialty tobacco leaves, and tobacco by-products. Alongside tobacco, we also supply selected agricultural commodities sourced directly from cultivation regions across India.

Our objective is to connect international buyers with authentic farm-origin products while maintaining transparency, quality consistency, and dependable supply.

# Our product **Portfolio**

## Tobacco **Products**

- Indian Burley Tobacco (Vinukonda / Sun-Cured / Air-Cured)
- Indian Rustica Tobacco (Indian / Gujarat / Calcutta Type)
- Chewing Tobacco Varieties (Red Chopadiya / Black Chopadiya / Gujarat Chewing)
- Specialty Tobacco Leaves (FCV / Oriental / Beedi Tobacco)
- Tobacco By-products (Stems & Midribs)

## Agriculture **Commodities**

- Onion (Size 25 - 85 MM)
- Potato New/old (30 - 90 MM)
- Ginger Wet/Dry (50 - 300 Gm)/Pcs
- Seasonal Produces (Fruits & Vegetables)
- Grains & Pulses

# FCV TOBACCO PORTFOLIO

©AKSYRA.EXPORTS

India is one of the leading producers of Flue-Cured Virginia (FCV) tobacco, widely recognized for its bright leaf color, smooth smoking characteristics, and high natural sugar content. FCV tobacco is cured using controlled heat systems in specialized curing barns, producing high-quality tobacco widely used in cigarette manufacturing and tobacco blending industries.

Aksyra Exports Global LLP sources FCV tobacco through established cultivation regions and reliable supply networks, ensuring consistent quality, proper curing, and export-ready preparation suitable for international tobacco processing industries.

## Available Varieties

- Indian Flue-Cured Virginia Tobacco
- CTRI Cultivar Series FCV
- Bright Leaf FCV Tobacco

## Key Features

- Mild to medium nicotine profile
- Bright golden leaf coloration
- High natural sugar content
- Smooth burning characteristics
- Suitable for cigarette blending applications
- Reliable curing and processing quality

# FCV TOBACCO PORTFOLIO

## Available Grades

- Lemon Grade FCV
- Orange Grade FCV
- Bright Grade FCV
- Red Grade FCV
- Brown Grade FCV

# FCV TOBACCO SPECIFICATIONS

Parameter	Premium Grade	Standard Grade	Commercial Grade
<b>Nicotine Content</b>	2.2% – 3.2%	1.8% – 2.5%	1.2% – 1.8%
<b>Moisture Content</b>	10% – 12%	12% – 14%	14% – 16%
<b>Color</b>	As Grade	As Grade	As Grade
<b>Physical Form</b>	Whole Leaf	Strips	Cut
<b>Foreign Matter (Sand)</b>	<0.5%	<1%	<2%
<b>Sugar</b>	12% – 18%	10% – 14%	8% – 10%
<b>Chloride</b>	0.5% – 0.8%	0.8% – 1.2%	1.2% – 1.5%

## Note:

Specifications may vary depending on leaf position, crop season, and curing conditions associated with flue-curing practices. The values presented above are indicative ranges based on commonly traded FCV grades. Actual quality parameters, including nicotine, sugar, chloride, and moisture content, will be confirmed through laboratory test reports based on specific buyer requirements and shipment batches.

The specification ranges shown above represent indicative values across multiple tobacco varieties. Actual chemical composition may vary depending on tobacco type, curing method, crop season, and origin. Final quality parameters will be confirmed through laboratory test reports and provided upon buyer inquiry.

# RUSTICA TOBACCO PORTFOLIO

©AKSYRA.EXPORTS

Rustica tobacco varieties are known for their strong nicotine strength and dense leaf structure. These tobacco types are widely used in chewing tobacco processing, traditional tobacco products, and industrial tobacco blending applications.

Aksyra Exports Global LLP supplies multiple rustica tobacco varieties sourced from recognized tobacco-growing regions across India.

## Available Varieties

- Rustica Chewing Tobacco (Calcutta Type)
- Indian Rustica Tobacco
- Gujarat Rustica Tobacco

## Key Features

- High nicotine strength
- Dense leaf structure
- Strong natural aroma
- Deep cured coloration
- Suitable for chewing tobacco and blending applications

# BURLEY TOBACCO

## PORTFOLIO

India produces several commercial grades of Burley tobacco cultivated under favorable climatic conditions and traditional curing methods. Burley tobacco is widely used in international tobacco blending due to its balanced nicotine profile and excellent flavor absorption characteristics.

Aksyra Exports Global LLP sources Burley tobacco through reliable cultivation regions and established supply networks, ensuring consistent quality, proper curing, and export-ready preparation suitable for international processing industries.

### Available Varieties

- Vinukonda Burley Tobacco
- Sun-Cured Burley Tobacco
- Air-Cured Burley Tobacco

### Key Features

- Medium nicotine profile
- Light to medium brown leaf color
- Low sugar content
- Stable burning characteristics
- Good flavor absorption capacity
- Suitable for cigarette blending applications

# ORIENTAL TOBACCO

## PORTFOLIO

@AKSYRA.EXPORTS

Oriental tobacco is a small-leaf aromatic tobacco variety traditionally cultivated in Mediterranean and Asian regions. The leaves are sun-cured and valued for their distinctive aroma, flavor contribution, and excellent burning properties. Oriental tobacco plays an important role in premium cigarette blends due to its aromatic characteristics and balanced nicotine levels.

Aksyra Exports Global LLP supplies selected oriental tobacco leaves through reliable sourcing networks, ensuring consistent curing quality and export-ready preparation suitable for international tobacco blending industries.

### Available Varieties

- Turkish Oriental Tobacco
- Izmir Type Oriental Tobacco
- Basma Oriental Tobacco

### Key Features

- Small leaf structure
- Aromatic flavor characteristics
- Balanced nicotine levels
- Excellent burning quality
- Suitable for cigarette blending

# DARK & TRADITIONAL TOBACCO **PORTFOLIO**

©AKSYRA.EXPORTS

Dark and traditional tobacco varieties represent a diverse category of tobacco leaves widely used in regional tobacco products and traditional tobacco processing industries. These tobacco types are generally sun-cured, air-cured, or fire-cured depending on the required flavor profile and nicotine strength.

Aksyra Exports Global LLP sources selected dark tobacco varieties from established cultivation regions, ensuring stable curing quality and consistent export preparation suitable for international buyers and tobacco processing industries.

## Available Varieties

- Dark Fire-Cured Tobacco
- Sun / Air-Cured Country Tobacco
- Gujarat Beedi Tobacco

## Key Features

- Medium to high nicotine strength
- Dark brown leaf appearance
- Strong natural tobacco aroma
- Suitable for traditional tobacco products
- Stable leaf structure for processing industries

# TOBACCO BY-PRODUCTS PORTFOLIO

©AKSYRA.EXPORTS

Tobacco by-products are obtained during the grading and processing of tobacco leaves. These materials are widely used in tobacco extraction industries and industrial tobacco processing applications. Tobacco stems and midrib are valuable raw materials for manufacturing reconstituted tobacco sheets and nicotine extraction processes.

Aksyra Exports Global LLP supplies tobacco by-products processed and prepared to meet the requirements of industrial tobacco processors and manufacturers.

## Available Varieties

- Tobacco Stems
- Tobacco Midrib

## Key Features

- Crushed Stems
- Loose Stems
- Size-Graded Material
- Custom Uniform Cutting Available

# PROCESSING & QUALITY ASSURANCE

Quality assurance begins at sourcing through direct engagement with cultivation regions. Tobacco is aggregated, graded, and stabilized to maintain uniformity in moisture and cleanliness suitable for export shipment.

## Quality Control Measures

- Farm-level sourcing inspection
- Lot segregation & grading
- Moisture monitoring
- Removal of foreign matter
- Controlled storage handling
- Buyer specification preparation
- Laboratory testing available upon buyer request.

At Aksyra Exports Global LLP, quality control begins at the sourcing stage through direct coordination with cultivation regions across Gujarat's tobacco-growing belt. Each lot is carefully aggregated, inspected, and graded to ensure consistency in nicotine profile, moisture balance, and physical characteristics before export preparation. We emphasize controlled handling practices to maintain the natural integrity of sun-cured tobacco while meeting commercial standards required by international buyers.

# Where It **Begins**

# PACKAGING & LOGISTICS

Flexible packaging solutions ensure product safety during international transportation.

## Packaging Options

- Compressed Tobacco Bales
- PP / HDPE Bags
- Carton Packing
- Customized Packaging

**Standard Bale Weight:** 25–60 kg (Customizable)

## Logistics Support

- FCL & LCL shipments
- Export documentation assistance
- Container loading supervision
- Moisture-safe handling practices

We implement secure bale packaging and streamlined shipping coordination to preserve quality from origin to destination.

# Global Connectivity

Leveraging India's strategic geographic position and well-established export infrastructure, Aksyra Exports Global LLP ensures efficient access to international markets. With proximity to major ports and organized shipment coordination, we facilitate smooth movement of goods across continents while maintaining product integrity and timely delivery.

Our supply network supports importers and processing industries across the Middle East, Africa, Southeast Asia, and other global markets. Through structured logistics planning and export compliance management, we aim to build seamless trade connections that bridge farm-origin products with international demand.

## **Serving importers and processors across:**

- Middle East
- Africa
- South Asia
- Southeast Asia
- Eastern Europe
- International Processing Markets

We aim to build sustainable global partnerships through dependable supply and consistent product quality.

# WHY CHOOSE **US** ?

**Aksyra Exports Global LLP** combines direct farm-level sourcing with disciplined export preparation to ensure consistent quality and dependable supply. Our structured lot grading, moisture control, and specification-based preparation allow us to meet diverse international buyer requirements with reliability and transparency.

By maintaining strong coordination across cultivation regions and implementing organized handling and packaging practices, we ensure product integrity from origin to destination. Our commitment lies in building long-term global partnerships through consistency, responsiveness, and professional export execution.

## **Direct farm sourcing from Gujarat tobacco cultivation belt**

- Direct farm-origin sourcing network
- Consistent and scalable supply capability
- Flexible product specifications
- Export-oriented quality handling
- Reliable shipment execution
- Transparent business practices
- Long-term partnership approach

# LET GROW **TOGETHER**

We welcome serious trade inquiries from importers, distributors, and processing industries seeking dependable supply of Indian sun-cured tobacco and agricultural commodities. Our team is committed to providing prompt responses, detailed specifications, and customized commercial proposals aligned with your sourcing requirements.

Whether you require product samples, pricing discussions, or long-term supply coordination, we are prepared to assist with structured communication and export-ready documentation.
